

It is my opinion that the requirement being proposed for enforcing copyrights is unconstitutional for this is an infringement of what individuals can receive and for individuals can do with the information being transported over the free radio/television frequencies.

This type of regulations further restricts the freedom that our ancestry's fought for in establishing this country. Yes we must protect individuals rights to intellectual property but any that uses the open brocast frequencies must be kept free with no restrictions. If commercial companies do not want to do this then they should stay within the various other means of getting their programs to the public such as scription services such as cable.
